Classroom Management: Managing Challenging Behaviors

In this course, you will begin to understand why students behave the way they do. By understanding the student, the teacher can shift his/her focus from controlling the student to teaching the student personal responsibility, allowing the student to become a self-regulated learner.

Course Objectives

At the end of this course, the learner will be able to:

- Review the non-negotiables of teacher–student relationships.

- Investigate three factors that influence challenging behavior.

- Consider the role of control and power in teacher–student relationships.

- Explore ways to ensure that students with challenging behavior patterns are successful.
